

PRODUCT INFORMATION LiBro-S_TY_US - 17.04.2023 - www.vsamerica.com

LiBro-Steel Rack system.

System consists of single and double-sided basic and add-on racks as well as additional parts to be built-in.
Construction: L or T-shaped stands of powder-coated rectangular steel tube with rows of holes for shelves as well as levelling screws. All racks have adjustable shelves and a special bottom shelf which is fixed.

Fittings: Shelves or magazine racks. The shelves have end supports, are folded down at front and back and fitted with a guide for hanging book ends on the underside. The magazine rack has 4 flaps which can be lifted and pushed-in (DIN A4) as well as a hard transparent plastic cover. Each item is made of powder-coated steel sheet folded at the edges.

The following material groups are available: Frame made of steel tube: M(light grey RAL 7035).
