

Product information

Serie 501

Sliding door wardrobe (top element).

Construction made of glued carcasses that can be combined next to and above each other to form wall units.

Body made of melamine-coated chipboard with glued plastic edge.

Front made of sliding doors, design as body, with various bow handles, shell handles, olive handles or handle strips. Optionally with cylinder lock, 4-point guide and door damping.

Interior fittings with rows of holes for shelves.

Installation: An add-on element can be stacked on top of a wall-mounted base element. A cover plate is available as an option to finish off the top. A 0.8 cm chipboard panel is positioned between all elements to create a shadow gap. Optionally available with black pull-out shelf.

The following material groups are available: Body, front and bases made of chipboard: L6; Cover top made of chipboard: L6; Cover top veneered: F1.
