

Product information

SpaceOrbiter Single-sided mobile storage elements with rails for Certwood bins.

Frame made from bent and welded rectangular steel tube on 4 lockable dual-wheel casters and a steel top. All steel parts are powder-coated.

Modular system consisting of 1 column.

Rail system of ABS plastic sits between the frames and allows bins to hang safely when pulled out, gaining access to the full bin. The rails fit different sizes of standard Certwood bins, with or without lids.

Bin Options: Storage elements for the 12.25" bin width can fit any combination of the four standard bin heights (single/3", double/6", triple/9", and quad/12") interchangeably.

The following material groups are available: Frame made of metal: M1; Certwood plastic bin: C9.

	Bins: S (SW) Standard width 12.25 in
