

Product information

SpaceStation

Stationary, wall-mounted storage elements with rails for Certwood bins.

Frame made from bent and welded rectangular steel tube on 4 adjustable feet and a steel top. Optionally with a rear panel, two side panels, and a hinged door made of steel. Side panels have a cutout for easy gripping. All steel parts are powder-coated. Storage elements must be fixed to the wall and can be connected together in a series.

Modular system consisting of 1, 2, or 3 columns.

Rail system of ABS plastic sits between the frames and allows bins to hang safely when pulled out, gaining access to the full bin. The rails fit different sizes of standard and custom Certwood bins, with or without lids. Storage elements for the 12.25" bin width can fit any combination of the four standard bin heights (single/3", double/6", triple/9", and quad/12") interchangeably. Storage elements for the custom 9" bin width can fit the VS exclusive bookbin (6" height) which is perfect for books, maker materials, and more. A combination storage element with one column for the 12.25" bin width and another column for the 9" bin width is also available.

Locking system with cylinder lock in door.

The following material groups are available: Frame made of metal: M1; Certwood plastic bin: C9.
