

PRODUCT INFORMATION SpaceWalk-G_TY_US - 24.10.2024 - www.vsamerica.com

SpaceWalk-G Mobile storage module with a guide system for GrateNells boxes.

Frame consisting of bent and welded rectangular steel tube on 4 lockable double swivel casters (d = 2.6 in) and a top sheet metal shelf. Optionally with a rear panel, two side panels and a hinged door made of sheet steel in different combinations. Side parts with a recess as a handle. All steel parts powder coated in color.

Modular system consisting of 1, 2 and 3 part elements.

Rail system between the frames with plastic guides and pull-out stop. In the guides different sized GrateNells boxes with or without lid can be variably inserted in the module as required. Optionally without back panel, modules can also be used on both sides.

Locking system optionally with cylinder lock.

The following material groups are available: Frame made of metal: M1; GrateNells plastic box: C3.

* Max. load per box: 5 kg.
