as key set

Dismounting key
for locking systems 18000 and 19000 (independent on lock number)

Spare parts order form

Master, emergency and dismounting key.

Note on the security

Anyone who possesses a master or emergency key for our series of units can open all the locks in the associated locking system and therefore has access to their contents!

For your own security, therefore, only the management of your institution is authorised to order a master key, e.g. the school administration or company management. These persons will then pass on the key internally at their own discretion.

The key will be delivered separately to the person who ordered it. Shipment is insured and undertaken by our parcel service provider.

Note on the key number

You will find the key number on the inner cylinder or on the key. Please also see the adhesive label on your model which specifies the order (AB) and model number as well as the week of delivery (LW).

Procedure for ordering master keys

Please complete the order form on page 2, sign the document and return it to us. Enter the number of keys on the left next to the price.

Procedure for ordering keys and inner cylinders

Please complete the order form on page 2.
Enter all the required key numbers and the corresponding number of units under the appropriate locking system.

Keys for the locking systems 6000, 7000, BN and >18501 are not available ex stock. The delivery therefore takes approximately three weeks. The delivery period for keys for the locking systems 18001–18500 and 4000–4099 is approximately one week.

Inner cylinders for the locking systems 18000, 4000, 6000 and 7000 are compatible with one another.
