# PILOT ROOM PROGRAM

ENHANCING LEARNING SPACES WITH DYNAMIC FURNITURE

## **PILOT ROOMS**

Pilot rooms are a great way to purchase furniture for just one classroom and test it out before you buy furniture for your whole school. It can also help build excitement and buy-in from teachers by giving them the opportunity to get familiar with the new furniture.

# ABOUT VS

Taking care of students is at the heart of it all – and at VS, we know that learning spaces have a long-term impact on students' physical, mental, and social well-being. VS' ergonomic furniture inspires motion and has the flexibility to adapt to every changing need.

Let's create learning spaces that embody dynamic flexibility, healthy ergonomics, and compassion – our kids deserve it.

**VS is a global leader and has been designing and manufacturing school furniture for over 125 years.**

## DID YOU KNOW?

**...AT A TIME**

### MOVEMENT IS KEY FOR LEARNING

Studies show that spontaneous movement is the only way children develop fully. Students need furniture they're free to move in – even small movements, such as fidgeting, improve test scores. VS products inspire motion, helping create stimulating learning spaces where movement is integrated into instruction to maintain attention and concentration as well as a sense of well-being.

### UNPARALLELED DURABILITY

At VS, we go to exceptional lengths to design safe furniture that weathers rambunctious students and the test of time. We create the highest-quality furniture so that once your furniture install is complete, you won't need to worry about new furniture – or any large maintenance costs – for a very long time.

### QUALITY, DURABILITY, AND SAFETY ALL ROLLED INTO ONE

VS furniture combines a uniquely distinctive design with resilience and durability. Our furniture is fully assembled in our manufacturing plant so it's delivered in one piece to your school – ensuring quality control every time.

Fully welded frames provide superior table strength and longevity.

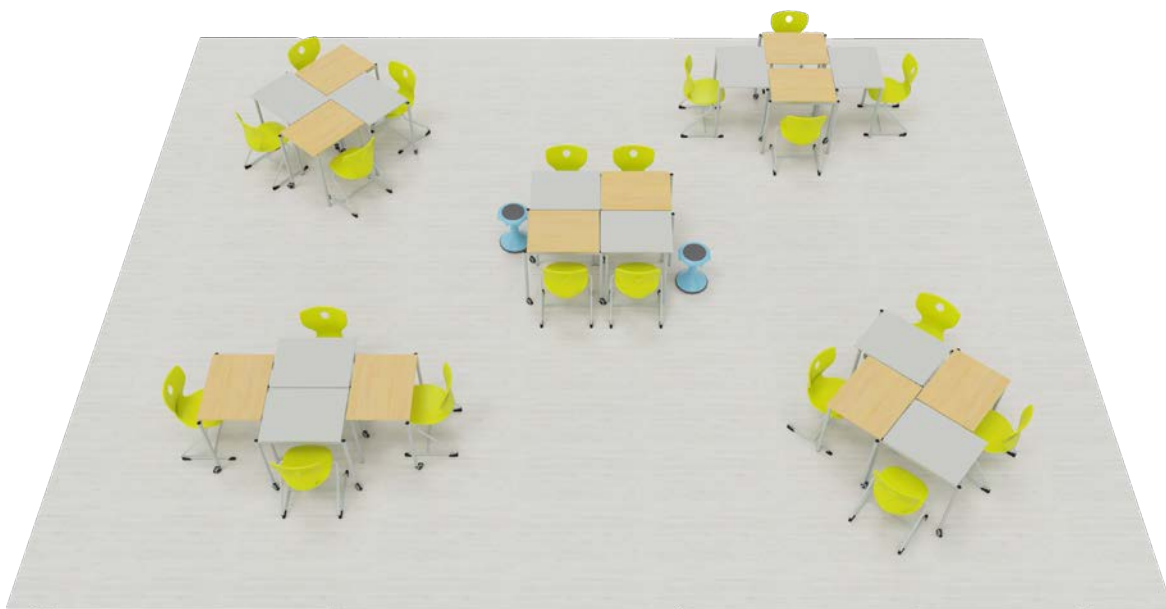

Double-walled, blow mold seat shells ensure comfortable sitting.

# ACTIVE SITTING PACKAGE

Designed to promote active sitting, our forward-flexing cantilever chairs provide unparalleled comfort, and the 12-gauge steel frame creates a gentle rocking effect. When these chairs are paired with stackable and mobile desks, you can easily create a multitude of flexible arrangements to support daily activities and lessons.

**Products shown are available through QuickShip and ready to ship within 10 days.**

# COLLABORATIVE TABLES PACKAGE

Experience a range of movement-friendly sitting options paired with versatile table solutions, including mobile and stackable individual tables, mobile group tables, and standing tables. Offering sitting and standing opportunities supports student agency by allowing students to sit or stand where they learn best. Complete your setup with storage solutions to enhance functionality and organization.

# AGILE LEARNING PACKAGE

In addition to our cantilever chair, elevate movement to the next level with our height-adjustable swivel chair – its 3D rocking mechanism provides dynamic sitting like no other. Pair these with mobile and stackable desks, collaborative group tables, storage solutions, and soft seating to create different zones for different learning styles in a single space. All of this, including offering options for sitting and standing, creates a space that is truly dynamic and flexible.

“Everyone has to spend money to replace classroom furniture. But when you can take that opportunity to shape the learning in terms of form, in terms of function, in terms of the types of learning activities they can support - the benefits are tremendous. The beauty in creating these types of spaces is that they are going to be just as functional 10 or 20 years from now.”

– Jamey Robertson, *Innovation and Creativity Coordinator*
