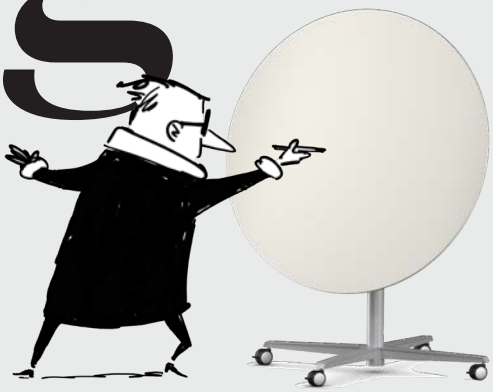
Agile furniture solutions by VS



Curious minds and growing bodies absolutely need freedom. ***To twist. Flex. And fidget.*** Leading with ergonomics. That's our priority. And what leads to **greater comfort**, **better health**, and **higher performance**.

Contents

Educational Furniture. VS has always been focused on designing inspiring spaces for learning. As one of the leading manufacturers of school furniture and a full-range supplier with a wide portfolio, this is what we offer our customers: comprehensive, stimulating furniture solutions for educational establishments. In addition, we offer an extensive range of services such as planning, project support, and customer service.

Our products stand out for their quality, functionality, and durability, as has been proved by comparisons worldwide. Sustainability is extremely important to us, as is safety.

We hope you enjoy browsing, discovering new ideas, and planning your space! If you need answers to any questions, advice, or project support, our qualified customer support staff will be delighted to assist you personally.

Ahead of the curve
since 1898.

VS America, Inc. provides highly adaptable, ergonomic, and environmentally-friendly educational furniture solutions which allow for the creation of agile learning environments across K-12 schools, colleges, libraries, and more.

VS America originates from a history of ergonomic innovation that dates back to 1898 with VS Vereinigte Spezialmöbelfabriken GmbH & Co. KG in Germany, the leading manufacturer of educational furniture. Focused on best practices for educational facilities, VS develops flexible, sustainable furniture of the highest quality and design for all learning environments.

At VS, we believe successful learning should balance the needs of the body, mind, and soul. We always encourage mobility and natural curiosity. From our fully adjustable chairs to modular tables that encourage collaboration, we believe that learning is an active process. When students engage their senses while learning, the long-term benefits include a heightened focus, stronger motivation, and a sense of well-being.

VS' innovative and integrative products continue to inspire creativity, promote autonomy, and encourage collaboration throughout educational facilities worldwide.

Reliable, sustainable *responsible.*

As a large, family-owned company, VS stands for a reliable, responsible, and independent business approach. The company has adopted a long-term strategy geared towards sustainability. This has given it its successful competitive position.

Continuity at the company site
VS develops and manufactures all its products directly at its headquarters in Tauberbischofsheim, Germany, and continuously invests in modern production facilities and highly efficient processes. This results in the creation of economically attractive furniture with exceptional functionality.

Facts:

- VS was founded in 1898 as Vereinigte Schulbankfabriken; one of the milestones in the company's history was the development of the wooden skid chair in 1950.
- VS is a family-owned company; its Managing Director is Philipp Müller.
- VS is a member of the UN Global Compact initiative, and as such has pledged to act as a role model in the observance and constant monitoring of ethical, social, and ecological business standards.

Quality and environmental standards:

- Quality management system according to DIN EN ISO 9001
- Environmental management system according to DIN EN ISO 14001
- Energy management system according to DIN EN ISO 50001
- VS is proud to be one of the first companies in the world to receive the Level 3 certification from the European furniture association FEMB.
- In addition, VS products have been awarded a range of quality and environmental certificates by external institutes, for example the BIFMA Level 3 sustainability certificate, the Cradle to Cradle certificate, the GS label for tested safety, the LGA pollutant-tested label, the AGR Healthy Back Campaign quality label (Aktion gesunder Rücken e.V.), the GREENGUARD certificate, and more.

*Make **peace** with* **fidgeting.**

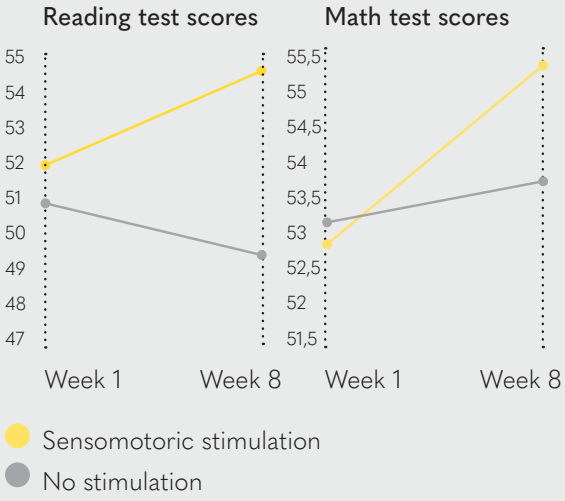
Children in particular, whose physical and mental development processes are not yet complete, require more regular movement stimuli than adults. That's how we can also explain the everyday image of students tipping their chair back to balance it on two legs – their unconscious is ordering them to move in order to prevent emotional, mental, and physical disorganization.

Elementary school-age children cannot sit still for longer than one minute, on average. And it's suggested that young people and adults shouldn't hold a body posture for longer than 15 to 20 minutes.

As soon as muscle fibers are activated, there are positive effects for body, mind, and soul:

- Blood circulation is increased, organs such as the brain receive more oxygen
- Biochemical messenger substances are released that lead to positive metabolic outcomes (including hormones, proteins, enzymes) for fat and sugar metabolism and promote neuroplasticity (growth and wiring of nerve cells)
- Students are more emotionally engaged and there is a positive impact on school performance

Research supports that low-intensity activities promote good health when done regularly (Banzer 2011; Levine 2002; Burzynska et al. 2014; Altenburg et al. 2015). Jean Piaget, psychologist, showed that sensomotoric skills are foundational to a child's development, and a lack of proprioceptive experiences can lead to issues with posture, concentration, and learning. Conversely, integrating exercise into school life has been linked to improved academic performance.



(Project "Schnecke" by the Ministry of Education in the State Hessen/Germany 2014)

Movement stimulates higher test scores. Studies show that students with regular movement breaks have significantly better test scores. Even small, responsive changes like flexible seating can improve performance. Movement is integral to thinking and learning, with everyday activities (e.g., fidgeting) being essential for cognitive and physical health.

"Watching a child makes it obvious that **development of body and mind** comes through ***movement***."

– Maria Montessori

Size Guide

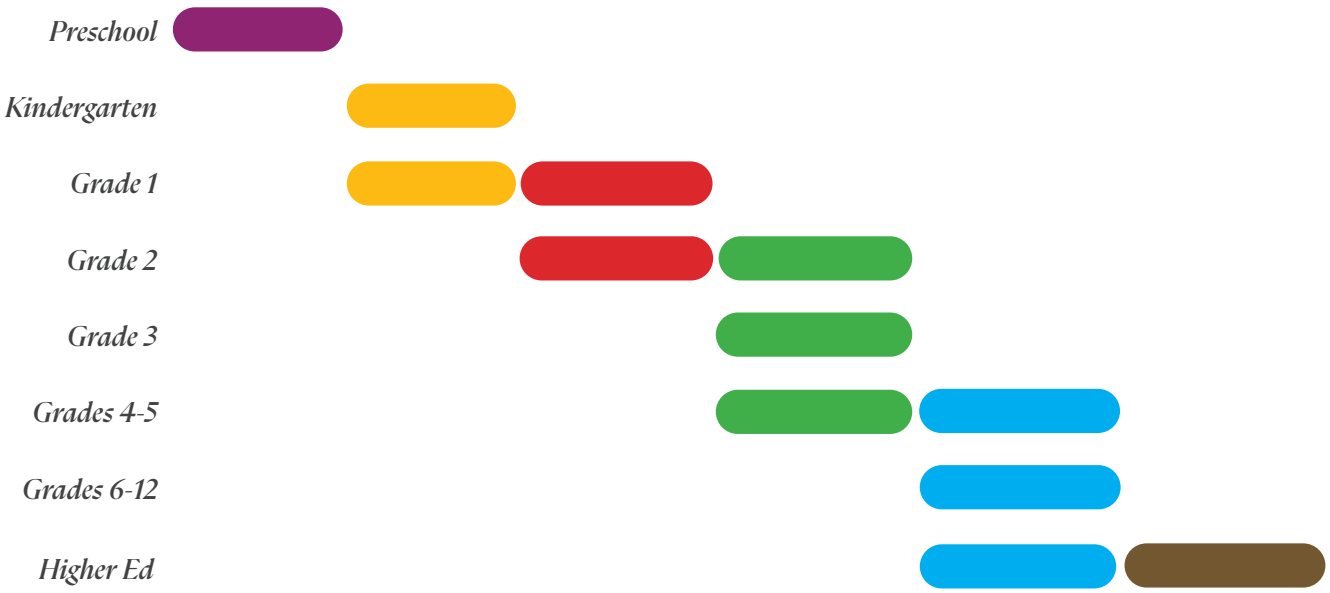
Table Height	20.9	23.25	25.2	28	29.95	32.3
Standing Table Height			34.65		41.75	47.25

Recommendations *by Grade Level*



Seating Chart Recommendation:

One size ***does not*** fit all—customizing seating enhances collaboration and productivity.

Choosing *the right* **sizes** *for* ***you.***

VS' tables and chairs are ergonomically designed. Their outstanding ergonomic properties are confirmed by the quality label awarded by the Healthy Back Campaign *(Aktion Gesunder Rücken e.V.)*.

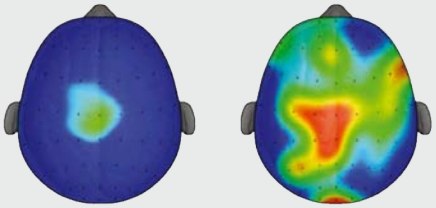
Correct sitting and ergonomic working can only be achieved when the student's chair is regularly adapted to suit their height. In the DIN EN 1729 standard, body height and seat/table height have been correlated and six table and seat sizes have been determined. The decisive factor is the regular checking of the size and individual selection because the height of students in one class depends on their individual development and can vary considerably. In other words, each student needs a chair and table which suits his or her height.

Children vary in size. This is why they often sit at furniture combinations that are not suited for them. Appropriately sized furniture is essential for optimum concentration levels and growth. Without correctly sized furniture, students could suffer from posture damage, and head and back pain.

The six chair sizes can be easily recognized by their colored dots. They range from a seat height of 12.25 inches in size 2 up to a seat height of 20.1 inches in size 7. The corresponding sit at table heights range from 20.9 inches to 32.3 inches. This range provides students, whether they are 3 foot 6 inches or 6 foot 9 inches tall, with the correct sitting and working conditions.

Physical activity is not only healthy, it's smart.

Consider the evidence.



No Exercise Exercise

Movement *is the way* **forward.**

Thinking and learning do not just happen in the head. From the moment of birth until an advanced age, the body is an integral part of well-being and of all intellectual processes. This also includes many intuitive activities that most of us are not even aware of and that emerge rather incidentally.

Researchers refer to these as "Non-exercise activity thermogenesis" (NEAT) (Levine 2002). They include all musculature activities that are not consciously organized and include everyday physical activities such as moving a chair back and forth, intuitive changes of position when standing or working on the floor, moving one's hands while talking, and even nervous foot-tapping.

Interior design contributes to an enriched learning environment.
Neuroscientific research highlights how enriched environments stimulate neuroplasticity and enhance learning. An active learning environment improves brain function and memory. Regular physical activity has cognitive benefits, especially for children with ADHD. The benefits of movement extend to long-term health and academic success.

Interaction between an organism and its environment can lead to important neurobehavioral changes – having a powerful effect on brain functions and structure, on learning and memory functions.

(Ickes et al., 2002 / KEMPERMANN et al., 1997 / ROJAS VEGA et al., 2010)

Ergo-Dynamics
Furniture in learning spaces plays a crucial role in influencing learning behavior and social interactions, offering opportunities for posture changes and movement. Research shows that relying solely on traditional furniture, like chairs and tables, leads to physical and mental health issues. Studies highlight the dangers of passive sitting, with low energy expenditure linked to obesity, type II diabetes, high blood pressure, dementia, and even cancer (*Dunstan et al. 2012; Katzmarzyk et al. 2009; Haly et al. 2017; Healy et al. 2008)*. In Western culture, children often sit for up to 10 hours a day, with poor posture, creating a harmful pattern that needs to be addressed.

People aged...

- 6 –10 should not sit still more than 5 minutes at a time.
- 11 – 15 should not sit still more than 10 minutes at a time.
- 16+ should not sit still more than 20 minutes at a time.

A healthy recommendation for the school day.

- 50% sitting (dynamic sitting on agile chairs)
- 30% standing
- 20% movement within the space

Seating *opens up the* conversation.

When you specify chairs, they should enable a high degree of freedom in your learning space. Easily adjustable to individual body heights. And flexible enough to respond to free flowing body movements.

It's key to understand that students at any age are not able to sit still for long periods of time. Having the ability to sit, stand, and move around is always optimal for healthy, growing, and often fidgety bodies. That's why chairs should not be used for long-term sitting and should feature agile, three-dimensional sitting, enabling micro and macro movements.

Multi-dimensional seat mobility promotes the right kinds of complex interactions between legs, pelvis, spine, shoulders, and head. In particular, "unlocking" of the pelvis is very important. The biomechanical analysis of the body shows pelvic movement activates the entire muscular and skeletal systems, benefiting the body in myriad ways.

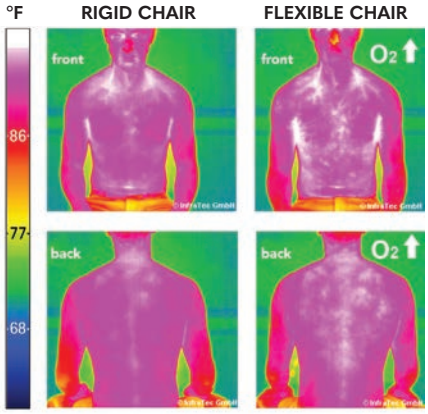


FIGURE FROM: LUDWIG AND BREITHECKER 2008

On the top right quadrant, you'll see a significant increase of oxygen supply while seated on a chair with 3D function. Compare this image to the left-hand side, which shows how sitting in a rigid chair leads to deficient circulation.

Seating

Product information

JUMPER Air Stool

Four-legged stool, cross-legged stool.

Four-legged stool.
Frame made of welded, powder-coated or chrome-plated tubular steel. Optionally with castors.
Stool in 5 fixed heights.
Seat shell made of double-walled, structured polypropylene (Air) for comfortable sitting with air cushion effect. Seat with rounded corners and concealed fastening.
Features and options. Glides or castors for hard or soft floors or 2C universal glides. See table for maximum stacking quantity.

Cross-legged stool.
Frame consisting of an aluminium cross base and a gas spring with plastic cover. Optionally with castors.
Height-adjustable and swivelling stool.
Seat shell made of double-walled, structured polypropylene (Air) for comfortable sitting with air cushion effect. Seat with rounded corners and concealed fastening.
Features and options. Glides or castors for hard or soft floors or 2C universal glides.

The following material groups are available: Frame made of steel tube: M1,(chrome-plated); Seat and backrest: C4.

		Seating heights (± 0.4 in) for students' stools ● 3 = 13.8 in ● 4 = 15 in ● 5 = 16.95 in ● 6 = 18.15 in ● 7 = 20.1 in

Product information

Hokki/Hokki+

Wobble stool, height-adjustable wobble stool.

Made from durable and extremely scratch-resistant polypropylene, fully recyclable. Comes with a lightweight foam pad (grey) or optionally with an extra-soft padded artificial leather cushion (black). Thermoplastic base screwed to the polypropylene body.
Stool in 4 fixed heights and 2 versions with gas spring height adjustment accessible from any position.
Function: Iconic wobble promotes flexibility and freedom of movement, allowing for a natural, 360-degree range of motion. Scalloped edge allows for a hang-on desk feature. The stools can be stacked together to save space. The fixed-height models are especially light and easy to carry by all ages.
The following material groups are available: Body made of plastic: C2.

		Seating heights (± 0.4 in) for students' stools ● 2 = 12.25 in ● 4 = 15 in ● 5 = 16.95 in ● 6 = 18.15 in ● 7 = 20.1 in

Seats **worthy** *of a* **sigh.**

Soft seating and lounge furnishings support the natural and changing need for hard work and recovery as well as excitement and relaxation. Depending on the work, they can also be used for relaxed and informal sharing or information processing, such as reading a book, quiet work, and more.

Lounge furniture with acoustic insulation offers places for retreat, relaxation, or private conversations.

Soft Seating

Product information

ClubLounge

Seat and couch elements.

Upholstered-element system with table and seating elements.
Seating elements are stools, easy chairs, sofas, benches, and corners sofas in two different seat heights. Individual elements can be combined into entire seating landscapes. Elements made of a floor plate with plastic, felt, or 2-component universal glides, and a cushioned section of flame-retardant MVSS-302 foam material with leatherette cover.
Table element same as the stool, but with an internal chipboard body and a graphite-grey (RAL 7024) powder-coated sheet metal covering that can be used as a table and playing surface.
The following material groups are available: Fabric cover: S40,64,82.

"The elements of Shift+ ***allow educators*** to continually find ***new applications.***"

– David A. Stubbs II, Designer of Shift+

Recreating *the* learning environment.

Shift+ is a unique set of tools, enabling educators to easily create their own environments. All of the **Shift+** furniture adapts to a multitude of teaching and learning styles simultaneously, fulfilling the needs of the specific occupants of the space at a precise point in time.

Our goal is to allow educators to begin with a blank canvas by selecting a set of tools that respond to their specific learning and teaching environments. From there they can efficiently move selected accessories in and out of the space depending on what they are trying to accomplish.

With **Shift+**, students and teachers are in a position to make new configurations themselves, without having to call on others for assistance.

Shift+ uniquely allows us to support the unlimited variety of learning possibilities and teaching styles in the most simplistic way possible. Every component within the **Shift+** family is light, mobile, and can be easily reorganized. They can be efficiently stacked, creating open areas. They are not constrained to a specific educational space – they are specifically designed to be transitioned and re-purposed throughout a school facility.

Shift+

Product information

Drum, Shift+ Landscape

Cylindrical table with integrated storage space for floor-level learning.

Body made from conical ABS plastic. The table is stackable.
Top made from phenolic (HPL). The top can be removed to access the storage space and is equipped with a groove to protect it from slipping. The storage space can accommodate carpets (09440) or upholstered mats (09445).
Padded mats consisting of a thick foam-padded body with anti-slip bottom, side carrying loop, and a black all-round surrounding strap. The top seat surface consists of a hard-wearing colored covering.
Equipment: Optionally available with a black polypropylene pen insert in the top.
The following material groups are available: Body made of plastic: C(white, black grey RAL 7021); Top made of phenolic (HPL): L4; Fabric cover: S40,64,82.

Product information

Leaf

Tent element for floor-level learning.

Tent elements for creating withdrawal areas in the classroom for individual children or small groups. The triangular elements can be combined with the mats from the Shift+ series to create tent configurations and nooks and crannies. Similarly, the textile sail-type elements can be fixed to any magnetic surface (cabinets from the Shift+ series) using magnetic fastenings. A tent pole, which can also be used in combination with the Drum storage table and/or the triangular Shift+ Landscape mats, makes it possible to construct a round tent consisting of a maximum of 6 sail elements.
Fabric sail element consisting of a stretch fabric and glass-fiber rods for tensioning the triangular surface. With 3 connection points on one end and one connection point on the other (pointed) end.
Tent pole is a solid wood pole with a stand plate made of HPL solid board, with a connection point positionable in two heights to affix up to 6 Leaf elements.
Shift+ Landscape mats optionally with connection points to attach Leaf (see above).
Magnetic fixings to fasten the sail elements to any magnetic surface.
Storage bag for transporting and storing the sail elements and curved glass-fiber rods.
The following material groups are available: Fabric sails: S77; Fabric cover: S40,64,82.

Shift+ Landscape

Soft seating and storage elements.

System consisting of upholstered seating elements as well as storage elements.
Upholstered elements are straight, curved, or angled stools. Individual elements can be combined to form complete landscapes. Elements have a floor plate with glides for hard floors, soft floors, or 2-component universal glides and a foam cushion with leatherette cover.
Seating sizes in 3 fixed heights in accordance with DIN EN 1729.
Storage units of laminated LIGNOpal chipboard with plastic edge. With glued center wall for partitioning the body and rows of holes (1") for adjustable shelf inserts, and a perforated-metal back panel.
Function: Curved seating and cabinet elements can be combined linearly and, thanks to the matched inner and outer radii, back-to-back to create circular and serpentine seating/cabinet landscapes.
The following material groups are available: Body made of LIGNOpal: L4; Perforated metal: M1; Fabric cover: S40,64,82.

Product information

Shift+ Up
Table-bench stand
for presentations and floor-level learning.

Multipurpose unit which can be used as a stand, table, or bench. Stand-on landscapes of a maximum of two levels can be created from the rectangular and triangular elements. Designed with the same widths as the Shift+ cabinets and mats.
Frame made from round steel tube with all-round rectangular tube edge. The legs are equipped with conical stacking and glides and can be securely stacked on top of one another up to a height of two using a spring buffer. Elements located next to one another (max 20 sqm) must be linked together using a flexible rotary connector. Optionally with guide for plastic Gratnells boxes.
Tops made from plywood. One side is non-slip and used for standing on, the other is used as a flat desk surface. The top can be turned without the need for any tools. The sides can be closed off with an insertable panel for use as a stand.
Transport cart for the tops and the elements inserted in one another.
The following material groups are available: Frame made of steel tube: M1; (plain black); Gratnells plastic box: C3.

Shift+ ThumbPrint

Stackable four-legged tables (concave/convex).

Frame made from welded round steel legs with a central frame of rectangular steel, all powder-coated. The table is stackable (see table).
Table in 7 fixed heights or with Allen-key height adjustment, heights in accordance with DIN EN 1729.
Tabletop made from a chipboard core and a continuous pressure laminated surface (CPL) with plastic edge or a phenolic (HPL) top. All with round corners.
Function: It is possible to combine the two mirrored concave-convex shapes in many ways to create circles, rows, or freely shaped groups.
Equipment and options: Tables with 2 glides and 2 lockable casters or with 4 glides for hard floors, soft floors, or 2-component universal glides. Tables are equipped with stacking protection on the underside of the frame.
Please note: A maximum of 3 stacked (non-loaded) tables may be moved on the casters.
The following material groups are available: Frame made of steel: M1; Top made of CPL: L2,(white writable); Top made of phenolic (HPL): L4.

Shift+ FusionFlip
Freeform folding table.

Frame made from two curved powder-coated steel tubes with a centrally positioned steel cross-piece with an articulated bracket.
Table in 4 fixed sitting heights, 2 fixed standing heights, or 2 step height adjustable options, heights in accordance with DIN EN 1729.
Tabletop made from a chipboard core and a continuous pressure laminated surface (CPL) with plastic edge or a phenolic (HPL) top. All with round corners.
Function: The table can be flipped using a two-handed safety mechanism under the tabletop and the top locks in both horizontal and flipped positions. When the top is flipped the tables can be nested together to save space.
Equipment and options: Tables with 4 lockable casters. Optionally with writable tabletop surface, turning the table into a projection or display surface.
The following material groups are available: Frame made of steel: M1; Top made of CPL: L2,(white writable); Top made of phenolic (HPL): L4.

Shift+ Transfer

Cabinet options and accessories.

Available with casters (two lockable), or adjustable feet.

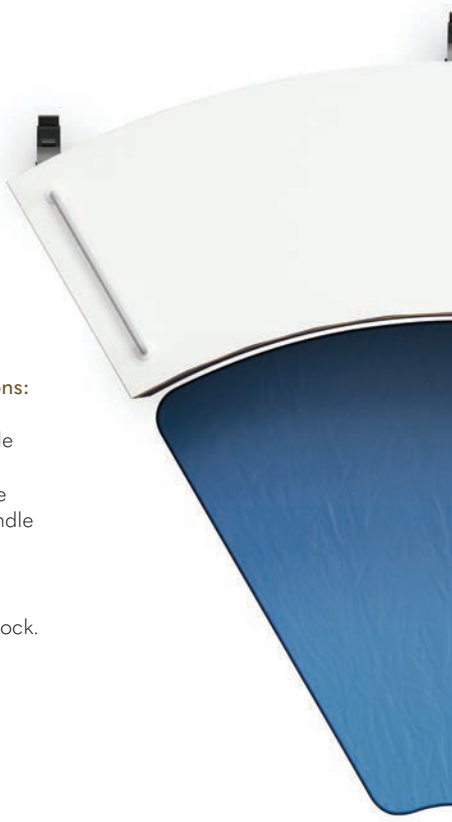
Mobile cabinets with optional handle.

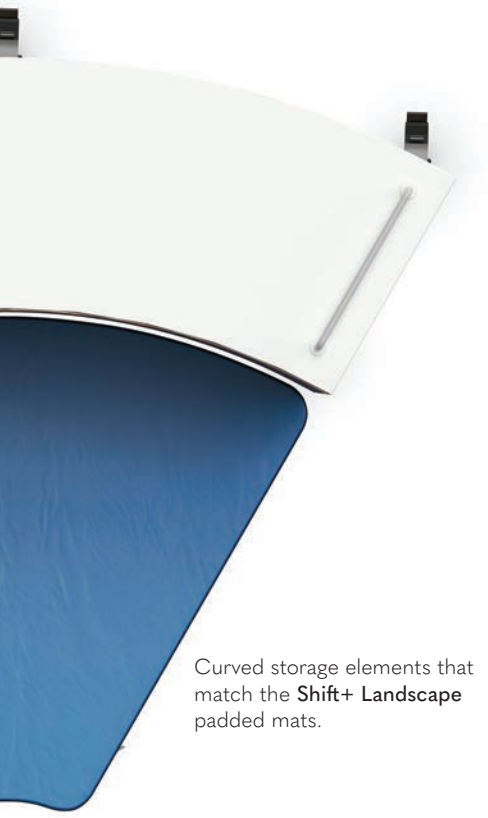
Compartments for bookbags, optionally with scratch protection.

Door handle options:

- Plastic bow handle
- Inset handle
- Metal bow handle
- Wooden bow handle
- No handle
- Knob

In all cases with a lock.





Curved storage elements that match the **Shift+ Landscape** padded mats.

Magnetic rear panel made from perforated steel.

Wardrobe units with 4-way or 8-way hooks.

Shelf inserts positionable at 1 inch intervals.

Magnets for the secure connection of cabinet elements.

Product information

Shift+ Transfer Teach

Mobile teacher storage elements.

Elements on a steel cross-member with 4 technical casters, 2 of which are lockable. Optionally with 4 adjustable feet.
Body made from laminated LIGNOpal chipboard with plastic edge and 2/3-height panels to divide the body in the lower area. With rows of holes (1") for adjustable shelf inserts and a magnetic rear panel made from perforated steel. With a lockable door on the left or right side.
Front consisting of 1 wing door with bow-type handle, flush handle, or knob.
Locking system optionally with cylinder or turn-knob locks.
Function: Optionally with magnets on the outer sides for linking other cabinet elements.
Pull handles (optional) made of steel on the top of the cabinet.
The following material groups are available: Body made of LIGNOpal: L4; Front made of LIGNOpal: L4,(orange, light blue, light green); Steel rear panel: M1.

Product information

Shift+ Transfer
Mobile shelving elements.

Elements are straight or curved (60°) on a steel cross-member. Straight elements with 4 technical casters (2 lockable), curved elements with 5 technical casters (2 lockable). Optionally with adjustable feet.
Body made from laminated LIGNOpal chipboard with plastic edge and panels that divide the body. With rows of holes (1") for adjustable shelf inserts and a magnetic rear panel made from perforated steel. Depending on the model, with storage space on both sides and a back panel separating the sides.
Function: With shelf inserts or select models with 4-way or 8-way wardrobe hooks. Optionally with magnets on the outer sides for linking other cabinet elements. Curved cabinets match the curves in Shift+ soft seating and tables so elements can be combined to form semicircles and serpentine lines, creating full landscapes.
Pull handles (optional) made of steel on the top of the cabinet.
The following material groups are available: Body made of LIGNOpal: L4; Steel rear panel: M1.

Creative options *that raise the bar.*

Whether you're looking for modern student desks or agile tables to maximize productivity and focus, or to facilitate collaboration and creative thinking, our collection has the solution. From height-adjustable and freeform tables in various sizes, all of our tables capture the design and execution of the ideal, productive learning environment.

Height-adjustable tables
Easily height-adjustable tables promote physiologically positive sitting postures. They can be raised as students grow and therefore don't need replacing over the school year. Individual tables on castors in different shapes can be combined with one another in many different ways and offer individual, rapid changes in forms of learning.

Tables that allow for standing
Standing tables and group standing tables with foot supports – very important for dynamic standing – are important basic furniture for indoor spaces. They encourage spontaneous posture changes (sitting/standing/stand-sitting). Accordingly, they should also be used for standing and not for continuous high sitting. High tables are particularly useful during group work. Ideal non-adjustable standing tables accommodate an average body height for the relevant age group, which means around 35 inches for 3rd to 7th graders and around 42 inches for 8th to 12th graders. Adapting the height precisely to individual users or a group for temporary use is not necessary. They're flexible to accommodate a variety of tasks and can be combined for large or small groups. They can also can be moved on casters throughout the school.

Continuously adjustable high chairs with a 3D rocking mechanism and an adjustable foot ring are the perfect complement to standing tables. These can be used for intuitive sitting or stand-sitting, and facilitate eye-to-eye level communication. Rigid seats are not healthy choices and shouldn't be specified.

Tables

Product information

Tano

Stackable, asymmetrical polygonal tables.

Frame made from welded round steel legs with a rectangular steel top frame, all powder-coated. The table is stackable (see table).
Table in 8 fixed heights or with Allen-key height adjustment, heights in accordance with DIN EN 1729.
Tabletop made from a chipboard core and a continuous pressure laminated surface (CPL), a laminated LIGNOpal chipboard with plastic edge, or a phenolic (HPL) top. All with rounded corners.
Function: Tabletop shape ideal for a variety of combinations and setups for individual and group activities.
Equipment and options: Tables with 2 glides and 2 lockable casters; with 4 glides for hard floors, soft floors, or 2-component universal glides; or with adjustable glides. Tables are equipped with stacking protection on the underside of the frame. Optionally available with built-in plastic Gratnells box integrated into the frame and a backpack hook.
The following material groups are available: Frame made of steel: M1; Top made of CPL: L2,(white writable); Top made of LIGNOpal: L4; Top made of phenolic (HPL): L4.

LiteTable-ST

Stackable tables.

Frame made from welded round steel legs with a rectangular steel top frame, all powder-coated. The table is stackable (see table).

Table in 6 or 8 fixed heights or height adjustable depending on model, heights in accordance with DIN EN 1729. Models with LIGNOdur top also available with step height adjustment.

Tabletop made from a chipboard core and a continuous pressure laminated surface (CPL) with plastic edge with square or rounded corners, or a phenolic (HPL) top. A2512 and A2513 models available with exceptionally strong LIGNOdur top with softly rounded waterfall edges.

Function: With uniquely spaced table legs that, when rotated 180 degrees, allow the tables to be lined up against each other to form a continuous row without gaps.

Equipment and options: Tables with glides for hard floors, soft floors, or 2-component universal glides, or with 2 casters at outer legs. Models with LIGNOdur top optionally available with 4 casters. Tables are equipped with stacking protection on the underside of the frame.

Please note: A maximum of 4 stacked (unloaded) tables may be moved together on casters; tables with LIGNOdur tops are not recommended to be moved when stacked, due to weight.

The following material groups are available: Frame made of steel: M1; Top made of CPL: L2,(white writable); Top made of LIGNOdur: L1; Top made of phenolic (HPL): L4.

LiteTable-ST

Stackable trapezoidal or semi-circular table.

Frame made from welded round tubular steel legs with all-round rectangular tubular steel top frame, all powder-coated. Because the inner and outer legs are arranged in pairs, the table is stackable. The edge of the top frame is equipped with stacking and glide protection. Tables with glide elements for hard or soft floorings or with 2C universal glide elements and, optionally, with two castors at the outer legs.
Table in 9 fixed heights.
Table top Consisting of a HPL or chipboard top and glued plastic border. Available with edged or rounded corners as required.
Optionally i t is also possible to use table connectors depending on the table arrangement (model 21003).

Product information

FlipTable-RU

Standing and sitting table with round frame and folding top.

Frame made from two bent, powder-coated or chrome-plated steel tubes with a centrally positioned black steel cross-piece with an articulated bracket.
Table in 3 or 4 fixed sitting heights depending on model, 2 fixed standing heights, or 3 step height adjustable options, heights in accordance with DIN EN 1729.
Tabletop made from a chipboard core and a continuous pressure laminated surface (CPL), a laminated or veneer-coated LIGNOpal chipboard with plastic or wooden edge, or a phenolic (HPL) top.
Function: The table can be flipped using a two-handed safety mechanism under the tabletop and the top locks in both horizontal and flipped positions. When the top is flipped the tables can be nested together to save space.
Equipment and options: Tables with 4 lockable casters. Optionally available with table connectors, and with writable tabletop surface to turn the table into a projection or display surface.
The following material groups are available: Frame made of steel: M1; Top made of CPL: L2,(white writable); Top made of LIGNOpal: L6; Top made of phenolic (HPL): L4; Top veneered: F1.

	w×h×d (for raised sitting)		65×40.6×44.9
	w×h×d (stand-at table)		65×43.35×44.9

Product information

RondoLift-Q
Height-adjustable sitting/standing table with square column.

Frame made from a square central column and a four-legged cross base, all powder-coated. Column with integrated gas spring and hand switch at the tabletop edge. This is protected against unintentional release of the gas spring.
Table height is infinitely adjustable (see table).
Tabletop made from a chipboard core and a continuous pressure laminated surface (CPL), a laminated or veneer-coated LIGNOpal chipboard with plastic or wooden edge, or a phenolic (HPL) top.
Equipment and options: The cross base is equipped with lockable casters or adjustable plastic or felt glides. The square tables are optionally equipped with a foldable and lockable tabletop from a width of 35.45" - when combined with the optional writable tabletop surface, the table can become a projection or display surface.
The following material groups are available: Frame made of steel: M2; Top made of CPL: L2,(white writable); Top made of LIGNOpal: L6; Top made of phenolic (HPL): L4; Top veneered: F1.

Product information

TriUnion

Stand-at triangular tables.

Frame made from welded, screwed, round steel legs with a rectangular steel top frame and round foot support, all powder-coated.
Table in 3 fixed standing heights.
Tabletop (right angle triangle with two equal sides) made from laminated LIGNOpal chipboard with plastic edge or a phenolic (HPL) top. All with round corners.
Function: Its triangular shape encourages collaboration by quickly bringing small groups together, while the ergonomic foot rail at varying heights provides comfort for all ages. The table fits through doorways wider than 35.5".
Equipment and options: Tables with lockable casters or glides for hard floors or soft floors. Optionally with table connectors, as well as chrome-plated foot supports and plastic kick protection.
The following material groups are available: Frame made of steel: M1,(chrome-plated); Top made of LIGNOpal: L4; Top made of phenolic (HPL): L4.
Further products on this page: Hokki.

Product information

Uno-M/Uno-M-Step
Skid desks.

Frame made from powder-coated steel tube with legs on flat tapering steel skids with plastic kick protection. Desk legs made from flat oval steel tube and cross-strut made from round steel tube.
Table in 6 fixed heights or with Allen-key height adjustment, heights in accordance with DIN EN 1729.
Tabletop made from laminated LIGNOpal chipboard with a plastic (KU) edge or a polyurethane (PUR) safety edge, depending on model. Some models available with exceptionally strong LIGNOdur top with softly rounded waterfall edges, and some models available with a chipboard core and a continuous pressure laminated surface (CPL) with polyurethane (PUR) safety edge or plastic (KU) edge.
Equipment and options: Desks with plastic glides or 2-component universal glides. Optionally available with metal grid bookshelf, backpack hooks, or different kinds of chair suspension.
Please note: The desk height may vary slightly depending on the type of desktop and the glides. Polyurethane (PUR) edges are extremely tough but may be subject to discoloration over time.
The following material groups are available: Frame made of steel tube: M1,(chrome-plated); Top made of LIGNOdur: L1; Top made of LIGNOpal-KU: L4; Top made of LIGNOpal-PUR: L2; Top made of CPL: L4.

Truth is, schools need a better way to **organize, store, and access their stuff.**

Modular storage solutions

The right storage solution should elegantly organize, unify, and complement any space.

Our modular systems are comprised of storage units crafted to provide personalization and versatility. Each design in our collection lends itself to a range of configurations, allowing you to meet the needs of your space. Whether you need a building-wide storage system, some comprehensive classroom or multipurpose space storage, our solutions allow for a seamless transition while maximizing use of space.

Storage

Product information

SpaceStation

Stationary, wall-mounted storage elements with rails for Certwood bins.

Frame made from bent and welded rectangular steel tube on 4 adjustable feet and a steel top. Optionally with a rear panel, two side panels, and a hinged door made of steel. Side panels have a cutout for easy gripping. All steel parts are powder-coated. Storage elements must be fixed to the wall and can be connected together in a series.
Modular system consisting of 1, 2, or 3 columns.
Rail system of ABS plastic sits between the frames and allows bins to hang safely when pulled out, gaining access to the full bin. The rails fit different sizes of standard and custom Certwood bins, with or without lids. Storage elements for the 12.25" bin width can fit any combination of the four standard bin heights (single/3", double/6", triple/9", and quad/12") interchangeably. Storage elements for the custom 9" bin width can fit the VS exclusive bookbin (6" height) which is perfect for books, maker materials, and more. A combination storage element with one column for the 12.25" bin width and another column for the 9" bin width is also available.
Locking system with cylinder lock in door.
The following material groups are available: Frame made of metal: M1; Certwood plastic bin: C9.

Product information

SpaceCraft
Plastic bins for SpaceStation and SpaceWalk storage elements.

Certwood bins in transparent color and 5 different sizes for the SpaceStation fixed wall-mounted storage and SpaceWalk mobile storage elements. Bins are removable, shatterproof, and transparent for easy viewing of contents. Five bins available, four that are 12.25" wide and in four heights (single/3", double/6", triple/9", and quad/12"); and one VS custom bookbin that is 9" wide and 6" high which is perfect for books, maker materials, art, STEM, STEAM, and more.

Accessories: Each bin comes with a ticket window (45497). To further customize organization, bins can be ordered with tray inserts (single division: 45489, 2 division: 45485, 3 division long: 45487, and 4 division: 45488), and the 9" bookbin can be ordered with a removable divider (45495) – up to 3 dividers fit in each bookbin. The 12.25" bins can also be ordered with lids (45496).

Configurations: The 12.25" wide bins are available in 7 combinations per column. 9x Single 3", 4x Double 6" & 1x Single 3", 3x Triple 9", 2x Quad 12" & 1x Single 3", Kit 1 (3x Single 3", 3x Double 6"), Kit 2 (2x Single 3", 2x Double 6", 1x Triple 9"), and Kit 3 (1x Double 6", 1x Triple 9", 1x Quad 12"). The 9" wide bookbin is available in 1 combination per column: 4x Bookbin 6".

The following material groups are available to choose from: Certwood plastic bin: C9.

	Max. load per 3″ bin: 11 lbs. per 6″ bin: 16.5 lbs. per 9″ bin: 16.5 lbs. per 12″ bin: 16.5 lbs.

Product information

SpaceStation-G
Stationary, wall-mounted storage elements with rails for Gratnells boxes.

Frame made from bent and welded rectangular steel tube on 4 adjustable feet and a steel top. Optionally with a rear panel, two side panels, and a hinged door made of steel. Side panels have a cutout for easy gripping. All steel parts are powder-coated. Storage elements must be fixed to the wall and can be connected together in a series.
Modular system consisting of 1 or 2 columns.
Rail system of plastic guides sits between the frames and ensures a pull-out stop. The rails fit both heights of Gratnells boxes, with or without lids, interchangeably.
Locking system with cylinder lock in door.
The following material groups are available: Frame made of metal: M1; Gratnells plastic box: C3.

Product information

Series 600
Media rack-1.

Body consists of a tubular-steel skeleton with 4 tubular corners/legs, a solid metal bottom and 3 perforated-metal sides, all powder-coated. **Standard** with design or special castors or optional adjustable feet.
Front of satin glass (single pane safety) with metal knob.
Organization with cupboard element with adjustable shelves of laminated LIGNOpal chipboard with plastic edges. Optional with pull-out shelf and side doors for installation of CPU.
Media technique can be integrated into the cupboard. Rear corner tubes can be extended upwards to accept a plasma display unit.
Electrification is achieved through holes with aluminum inserts in the top as well as through an optional removable back.
Locks. Optionally with cylinder or turning knob locks.
The following material groups are available: Frame made of steel tube: M1,(chrome-plated); Front made of glass: G2; Body made of steel: M1.

Product information

Series 800

Add-on cabinets and shelves (3 FH, wide: 31.5 - 47.3).

Element cabinet (for details, see table) in the height unit 3 FH.
Type: Shelving or wing-door add-on cabinet, some with center partition flush with the body or set back (CPsb) for horizontal body division. Optionally with pedestal for mounting a ladder rail.
Front open or consisting of 2 separately closing single-wing doors or one double-wing door (CPsb) with bow-type handles, inset-type handles or knob handles.
Locking system optionally with cylinder or turnknob locks.
Interior equipment consisting of adjustable shelf inserts.

Niches for installation in cabinet walls

Element cabinet (see table for details) in heights of 2, 3 and 4 height units.
Type: Niche as open storage space for decorative purposes or with cushioning as comfortable sitting area.
Body consisting of two side parts, an upper and lower panel and a rear wall. The upper and lower panels are placed flush against the side parts and fixed with dowels. Sides and upper/lower panels made from 1.6 in chipboard and rear wall from 0.8 in chipboard.
Element cabinet (see table for details) in height of 1 height unit.
Type: Open shelving cabinet as substructure for niches.
Padded mats made from foam with easy-to-clean artificial leather covering, black all-round surrounding strap and non-slip bottom with hidden zip fastener. Can be used as comfortable cover for sitting niches in cabinets.
The following material groups are available: Body made of chipboard: L6; Body made of chipboard with laminate: L3; Fabric cover: S40,64,82.

Reshape the conversation.

Mobile screens and partition walls that can be used as writing boards or for display are essential classroom fixtures. As mobile furniture elements, these create changeable learning space configurations, separating spaces both visibly and acoustically.

Mobile Screens & Partition Walls

Product information

LinkUp
Mobile partition walls.

System of individual mobile partition walls. Several partition walls can optionally be linked together using magnetic connecting fittings.
Partitions can be arranged flush against each other to save space.
Frame made from a steel tube running all the way around on a crossbar with a filling element or an all-round fabric covering.
Filling element made of **1.** a magnetic and writable, enameled chipboard, **2.** a cork-coated, pinnable chipboard, or **3.** a cork- and textile-coated, pinnable chipboard.
All-round fabric covering as **4.** privacy screen and optionally with an acoustically effective filling.
Support elements consisting of 2 short runners, each with 2 casters.
The following material groups are available: Frame made of metal: M(arctic, black RAL 9011); Writing surface made of steel: E(white); Pinboard made of cork: K(natural cork); Pinboard made of fabric: S72; Fabric cover: S46,51,52,74,78,79,80.

Series 2000

Typ M. Functional partition.

System of mobile individual elements.
Frame construction with an all-round aluminum profile section and a filler element. Side profile section with a vertical functional rebate and an integrated pull-out plastic welt for tool-free joining of two functional screens.
Filler element 1. Melamine-resin-coated chipboard. **2.** Magnetically adherent enamel-coated chipboard. **3.** From a lightweight top with fabric covering. **4.** Melamine-resin-coated acoustic panel with slotting. **5.** Double-section panel.
Support element consisting of short and long stabilisers with castors.
Note. The maximum load must not be exceeded when integrating accessories in the function groove (see table).
The following material groups are available: Frame made of aluminum: M(anodisé); Stabiliser and foot made of aluminum: M(arctic, black RAL 9011); Writing surface made of steel: E(white); Fabric cover: S46,52,74,78,79,80; Acoustic front made of chipboard: L10; Front made of chipboard: L6.

Product information

Series 2000

Typ P. Folding screen (2/3 parts).

System consists of 2 or 3 flexibly-jointed, mobile, free-standing screen.
Construction is based on a four-sided frame of aluminum profile and a filling element. Add-on elements are connected by a flexible joint and can be easily folded together.
Filling elements: 1. Melamine-resin laminated chipboard. **2. chipboard** laminated with a vitreous-enamelled metal sheet to which magnets adhere (at level 61.05 in). **3.** From a lightweight top with fabric covering. **4.** A melamine-resin laminated sound-absorbing panel with slits. **5.** A translucent double-ribbed board.
Supporting element consists of short struts each with 2 castors and a supporting castor. For safety reasons paravent screens in kindergartens and schools must be fitted with a push-handle.
The following material groups are available: Frame made of aluminum: M(anodisé); Stabiliser and foot made of aluminum: M(arctic, black RAL 9011); Writing surface made of steel: E(white); Fabric cover: S46,52,74,78,79,80; Acoustic front made of chipboard: L10; Front made of chipboard: L6.

Sustainability

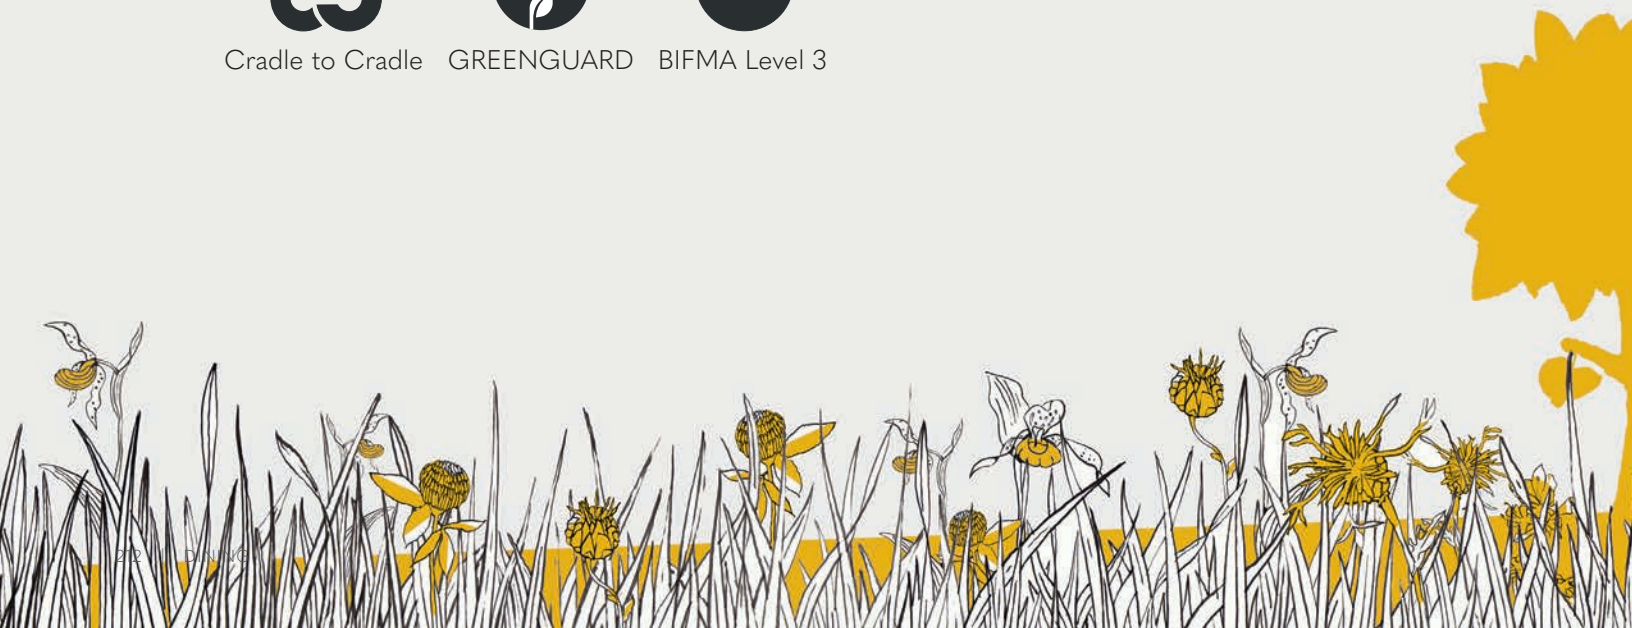
Over a century of sustainability and craft.

For over 125 years, VS has been providing outstanding educational furniture that brings visionary design concepts into the places we learn, work, and play. Although much has changed in the industry over the decades, our fundamentals stay the same. Our long-standing commitment to sustainability and quality craftsmanship remains our mission at VS.

As a company, we have always considered it our responsibility to commit to measures that benefit people, while protecting the natural environment. We offer our customers safe, healthy, long-life products, all manufactured in a way that contributes to environmental protection.

Product certifications include:

Cradle to Cradle GREENGUARD BIFMA Level 3



VS headquarters, designed by Behnisch Architekten, utilizes high-performance building and design strategies.

We deliberately control our energy consumption by keeping well below the permitted limit values in our new building projects, continuously improving our energy performance. Our gas-fired cogeneration plant covers 36 percent of our electricity consumption and also provides us with additional heating energy.

QuickShip Program

When a project requires a short turnaround time, the QuickShip Program will help get products installed faster — in-stock products ship in 10 business days or less.

Explore available products at vsamerica.com/quickship.
